

EVENTS AND CONFERENCES

We're proud to have Jiawen, our Chief Operations Officer, on the panel for the blockchain industry sharing session on "The Future of Blockchain: Payments and Scalability" held at WeWork Singapore last Wednesday. She covered Consentium's contributions to the future of crypto payments – something that we have been growing and expanding in.

CO-FOUNDER &
COO, HODLJAH

NGEOW JIAWEN
CO-FOUNDER &
CEO, MEGAX

NETWORK WITH:

HOSTED BY GROUNDED

CO-HOSTED BY FINWEX & SUSI CAPITAL

Consentium took its first steps into the payment system when we were listed on the MegaXstore as an accepted form of currency. We also developed the P2P payment transfer feature in our App such that users can send and receive cryptocurrencies simply through the chat function or by scanning the receiver's QR code. At the recent event partnership with Huobi on New Year's Eve of 2019, merchants and consumers had their hand at the App's payment function.

Jiawen also spoke about Consentium's scaling strategies on the use of cryptocurrency as a conventional form of payment.

“Consentium will be the first chat app in the market that rewards in-app actions” says Jiawen. We want to become the WeChat of the cryptocurrency community and to build products that would further enhance the blockchain ecosystem.

As Chinese New Year is round the corner, we're introducing the e-Hong Bao feature into our App, fusing the modernity of cryptocurrency and technology with a traditional custom.

Building cryptocurrency on blockchain is just another function to equalise financial opportunities. There is still so much ahead for blockchain technology. We hope that you are as excited as us to go on this journey to further expand the usage of blockchain to make the world a better place.
